

Green Profile

“Celebrating our 25th year of Environmental Responsibility”

Oil Eater® products were founded on the concept of environmental safety & responsibility. Our brand was built by replacing environmentally unsafe products such as solvent based cleaners with safer, biodegradable, non-hazardous products.

We are proud to apply the SAFEsm logo to our complete line of environmentally responsible products. These products include:

- | | |
|----------------------------------|-----------------------------|
| Oil Eater® Cleaner / Degreaser | Oil Eater® Orange Cleaner |
| Oil Eater® “Naturals” Absorbents | Oil Eater® Truck & Bus Wash |

Each of these products has contributed to our Green Profile through:

- * Lowering VOC levels
- * Utilizing a Primarily Local Supply Chain
- * Utilizing Renewable Resources
- * Reusing Resources
- * Increasing Concentrations
- * Increasing the use of Post Consumer Recycled raw materials

Our goal is to produce the lowest Carbon Footprint possible, with the smallest Bio-Impact. We strive for this goal not only because it is the right thing to do, but because in so doing, we produce high quality products at a low cost. From production through use each of these products supports the concept that being green is good business.

For details on how we strive to achieve these goals please call 1-800-528-0334.
